Important data checks before production import:

1. Jamal Ramadhan Hassan and Kelvin Alfayo Lipeleko were both supplied with registration number**2024-02-00261**. Confirm Kelvin's correct number. Kelvin's number is blank in the CSV to prevent Jamal from being overwritten.

2. Steven Kivuyo appeared twice with matching registration, phone and email; the entries were merged as**Steven Saulo Kivuyo**.

3. Seven students have no supplied registration number. The importer can create them, but registration numbers should be added later.

4. The current importer treats the supplied phone and email columns as parent/guardian contact fields.
